Summary

Software Engineering student at INSAT (National Institute of Applied Sciences and Technology, Tunis), passionate about Machine Learning, Data Science, Web Development, and Distributed Systems, with hands-on experience building full-stack websites and AI-powered apps. Currently pursuing a Machine Learning Scientist certification, alongside completed certifications in SQL, Python, Data Manipulation, and Feature Engineering.

Education

INSAT – National Institute of Applied Sciences and Technology	Tunis, Tunisia
Software Engineering – Engineering Cycle (Cycle Ingénieur)	2026 – Present
INSAT – National Institute of Applied Sciences and Technology	Tunis, Tunisia
Integrated Preparatory Cycle (Cycle Préparatoire Intégré)	2024 – 2026

Professional Experience

Web Marketing & SEO Intern	Sousse, Tunisia
<i>Elzei Consulting</i>	July 2026 – Present
- Conducted a full SEO diagnostic and action plan for Elzei Portage, covering site structure, content, and technical/mobile SEO. - Building custom WordPress plugins using WordPress hooks (actions & filters) to solve real problems on a live production site.	

Academic & Personal Projects

.INSAT (dotINSAT)	2026
<i>University Project – Team of 5</i>	
- Collaborated with a 5-person team to build a full digitalization platform for INSAT, covering student, professor, and admin accounts. - Implemented exam grading, average computation, student complaints, and a Reddit-style blog for students and professors. Technologies: PHP, Symfony, PostgreSQL; UI/UX designed in Figma.	
Pharmacy Management System	2026
<i>University Project – Team of 5</i>	
- Collaborated with a 5-person team to design and develop a full Java desktop application for pharmacy operations. - Implemented JavaFX interfaces for stock, appointments, sales, and revenue tracking, backed by a MySQL database. Technologies: Java, JavaFX, MySQL.	
Al Quran Al Kareem	2026
<i>Personal Project – Distributed Systems Application</i>	
- Developed a Spring Boot backend integrating the Open Quran API, paired with a clean frontend displaying Surahs and Ayahs. Technologies: Spring Boot, Rest API, Java, Open Quran API, HTML/CSS/JS.	
NLP Swiss Army Knife	2026
<i>Personal Project</i>	
- Built a Gradio interface combining three HuggingFace NLP pipelines: summarization, translation, and document Q&A. Technologies: Python, Gradio, HuggingFace Transformers.	
INSAT Grade Calculator	2026
<i>Personal Project</i>	
- Built a client-side web app for INSAT students to estimate semester averages, with dynamic forms and real-time computation. Technologies: HTML, CSS, JavaScript.	
ML-Exercises	Ongoing
<i>Personal Project – Machine Learning Practice</i>	
- Built and iteratively improved ML models on real-world Kaggle datasets, using ydata-profiling for automated EDA reports. Technologies: Python, scikit-learn, pandas, numpy, ydata-profiling.	
CobbleTunes	2026
<i>Personal Project</i>	
- Developed a Spring Boot backend for a Minecraft-inspired music streaming application; frontend planned for a future iteration. Technologies: Spring Boot, Java.	

Skills

Programming Languages:	Java, Python, SQL, PL/SQL, C, C++, PHP, JavaScript, GDScript (learning)
Frameworks & Libraries:	Spring Boot, Symfony, JavaFX, scikit-learn, pandas, numpy, Gradio, HuggingFace
Databases:	MySQL, Oracle, PostgreSQL
Toolkit:	Git, GitHub, VS Code, PyCharm, IntelliJ IDEA, DataGrip, CLion, MySQL Workbench

Languages

Arabic: Native — French: Fluent (C1) — English: Fluent (C2)
